

## SIMS Disaster Recovery Center Sign-up

Please enter our company into your Disaster Recovery Center Program. We understand that this program will allow signals to be processed at your center in case of a disaster at our site. We also understand that SIMS will provide personnel for short-term coverage for our dispatching capabilities (usually less than 30 minutes) as quickly as possible and that there will be additional charges for these Disaster services.

We also know that it is our responsibility to assume our own dispatch or to contract with another Central Station as quickly as possible using the SIMS Disaster Recovery Site's Terminal Services. SIMS, Inc. will provide our Disaster Recovery Certificate as soon as our initial testing has taken place.
